Are you interested in participating in research?

The McLean Hospital Geriatric Psychiatry Research Program is interested in learning about the effects of cannabidiol on individuals with mild to moderate Alzheimer's Dementia and anxiety and other behavioral symptoms.

You may be eligible to participate in a research study conducted at McLean Hospital, an affiliate of Harvard Medical School if you:

- Are between the ages of 60-90 years old
- Have a diagnosis of probable Alzheimer's Dementia and experiencing anxiety and other behavioral symptoms
- Are fluent in English

This study consists of:

- 10 research visits with our study staff, in person and via phone, over 3 months.
- Option to come in for four follow-up visits over the course of 12 months after the completion of the 8-week trial.
- Receiving a high- cannabidiol (CBD), low-tetrahydrocannabinol (THC) sublingual solution on a daily basis.
- There are no blood draws, MRI scans, or medication changes needed for this study.
- You will receive up to $300 in compensation for participating in this study. $30 for each in person visit and $10 for each phone visit.
- To enroll in this study or for further information about this study, please contact **Kaitlin McManus at 617-855-3192 or kmcmanus@mclean.harvard.edu**
